

AER Worldwide

The Electronics Lifecycle Resource

The Integrated End of Lifecycle Solution

AER Worldwide services include: Electronics Recycling, IT Asset Management and Component Re-distribution. We are committed to Brand Protection, Environmental Stewardship and Value Recovery.

Background

AER Worldwide has been in business for over 20 years. Headquartered in Fremont, California, our global footprint consists of six facilities which are AER owned and operated and a network of subcontractors which allow us to provide service to clients in North and South America, Europe, Asia and Australia. Our client base includes many Fortune 100 and 500 companies in addition to government and educational institutions.

AER Worldwide is both ISO:140001 and R2/RIOS certified. In addition to these certifications, AER Worldwide has implemented a company-wide Environmental Management System (EMS) to which all facilities comply.

Client Reputation

Our clients have peace of mind knowing that their reputation and brand are protected and the material they send is processed in an environmentally sound fashion. AER Worldwide continuously strives for security and a favorable reputation, not only for us, but for our client base as well.

It is imperative that our clients know the process and location of their product the moment AER takes responsibility. Transparent reporting is one of AER's core competencies. When reuse and remarking are not an option, we destroy and properly recycle our clients' material in an environmentally sound manner. This means not only destroying the units designated for destruction, but also tracking, auditing, and reporting the downstream material flows on a lot-by-lot basis.

Company Overview

- 20 years in business
- Global Coverage
- R2/RIOS Certified
- ISO:140001 Certified
- Electronics Recycling
- IT Asset Management (ITAM)
- Environmental Stewardship

Our Mission

Provide maximum asset recovery from your excess electronic component and electronic waste streams while eliminating your downstream environmental liabilities.

“We work diligently to provide the most efficient and effective methods to process our clients’ excess and obsolete electronics. Working to give them an environmental edge over their competition, and help their customers know they are using a safe and environmentally conscious company.”

Andre’ Weiglein
President, AER Worldwide

Strategy

Electronic Waste Processing

- Close-to-source material sorting and destruction.
 - Eliminates unnecessary shipping of low value, highly recyclable materials (i.e. steel, cardboard, foam).
- Assured destruction
 - Brand Protection
- Track, audit, and report downstream material flows.
 - Eliminates downstream environmental liabilities.

Re-distribution Services

- Resale Services
- Purchasing Services

Hard Drive Erasing

- Sanitize single or multiple hard drives with our custom data erasing solution utilizing DOD approved software.
- All Hard drives are tested to customer requirements:
 - Department of Defense 5220.22 M
 - Secure Erase Standard, NIST

IT Asset Management

- IT assets designated for resale are transferred to our Technical Department where they are physically inspected, tested and individually listed in our asset management database.

Global Resale Channels

- Direct to End Users
- Back into Contract Manufacturers and Test/Repair Vendors
- Secondary/B-Channel Markets
- Independent Distributors and Brokers
- Online Exchanges (i.e. Amazon, eBay, IC Source, Net Components)

Market Segments

- Networking
- Telecom
- Data Center
- Computing
- 3PSP (third party service provider)
- Government
